Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the annular baffle must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,386,375 to Olsen.

Olsen discloses a sealed wheel case for use in a vibratory device (Col. 1, lines 43+) which includes:

- a housing having a base, peripheral sidewall, and a cover which has an aperture to receive the shaft (See Figs. 2A and 8; See also Col. 3, lines 6+). Further, the housing holds the wheel and a quantity of lubricating oil (Col. 1, lines 44+);

Art Unit: 3653

- a seal (since the box is closed {Col. 1, lines 43+} it is inherent that there is a seal around the shaft adjacent to the aperture in the cover to prevent the oil from leaking; see also Fig. 8);

- a plurality of attachment bolts (Col. 3, lines 55+; See also Fig. 8).

While Olsen does not specifically disclose an annular baffle, baffles for directing oil within a housing are known in the art (See e.g. US Patent No. 4,077,873 to McKibben).

Therefore, it would be obvious to one of ordinary skill in the art, to use an annular baffle to direct oil in such a housing as disclosed by Olsen. Further, there is motivation to use an oil directing baffle in that it ensures the proper elements are lubricated.

In regard to claim 2, labyrinth seals are well known in the art (See e.g. US Patent Nos. 5,220,846 to Niklewski, 4,170,549 to Johnson). It would be obvious to one of ordinary skill in the art to use such a seal in the type of housing disclosed by Olsen.

Allowable Subject Matter

Claims 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
